

PEO Module — Caveman Edition Explainer

Audience: Non-IT faculty (Dean, Chairpersons), accreditation reviewers **Purpose:** Explain how the PEO Attainment module works in plain language **Companion to:** [PEO-IMPLEMENTATION-PLAN.md](#) (technical spec)

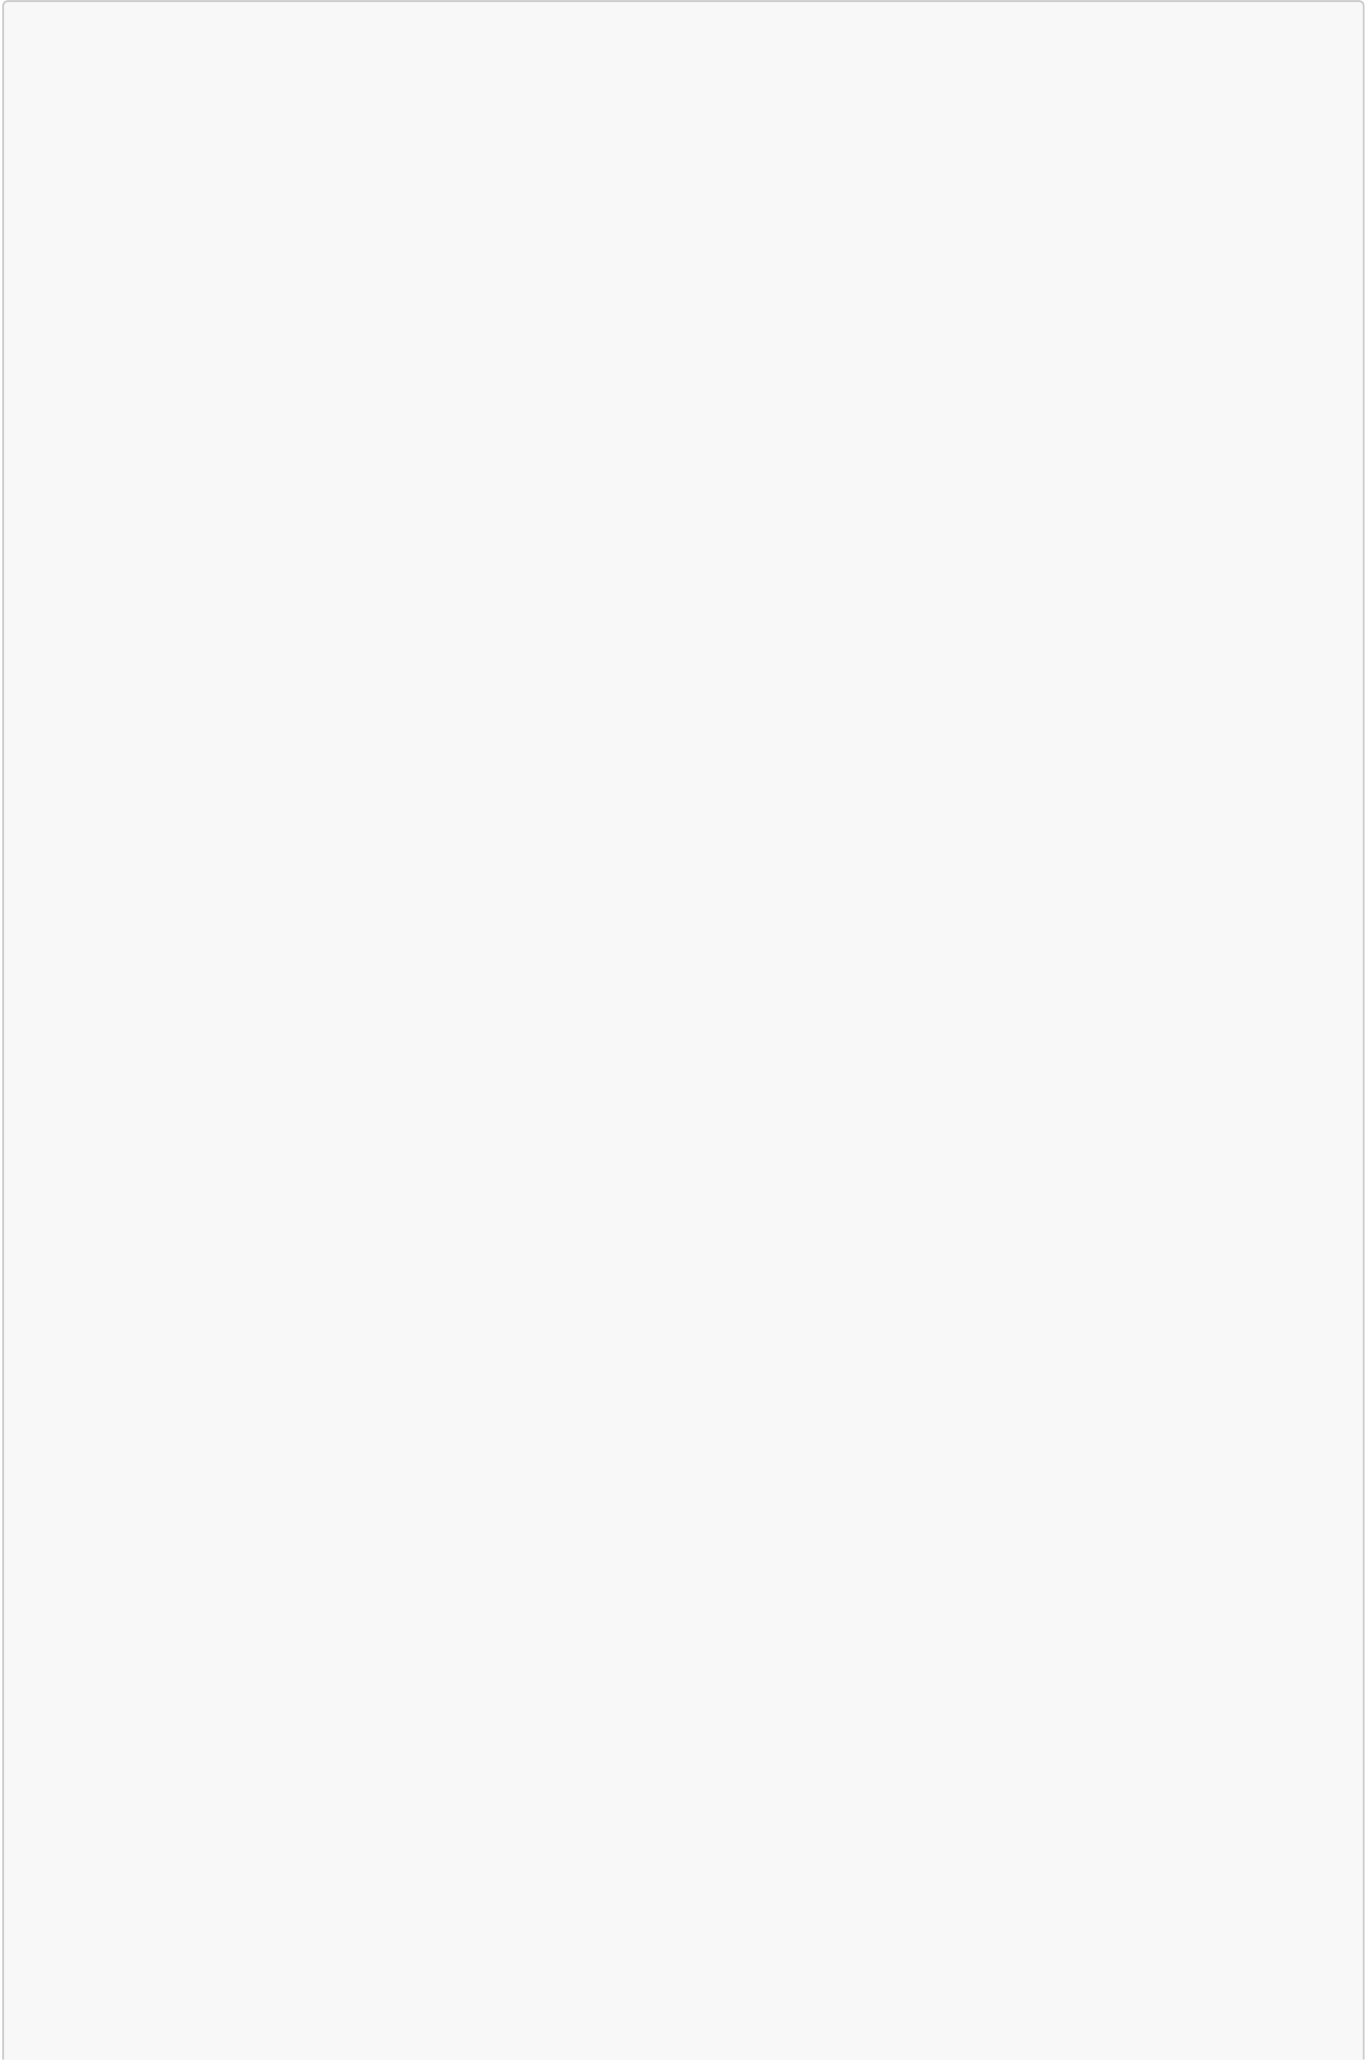

What This Thing Does

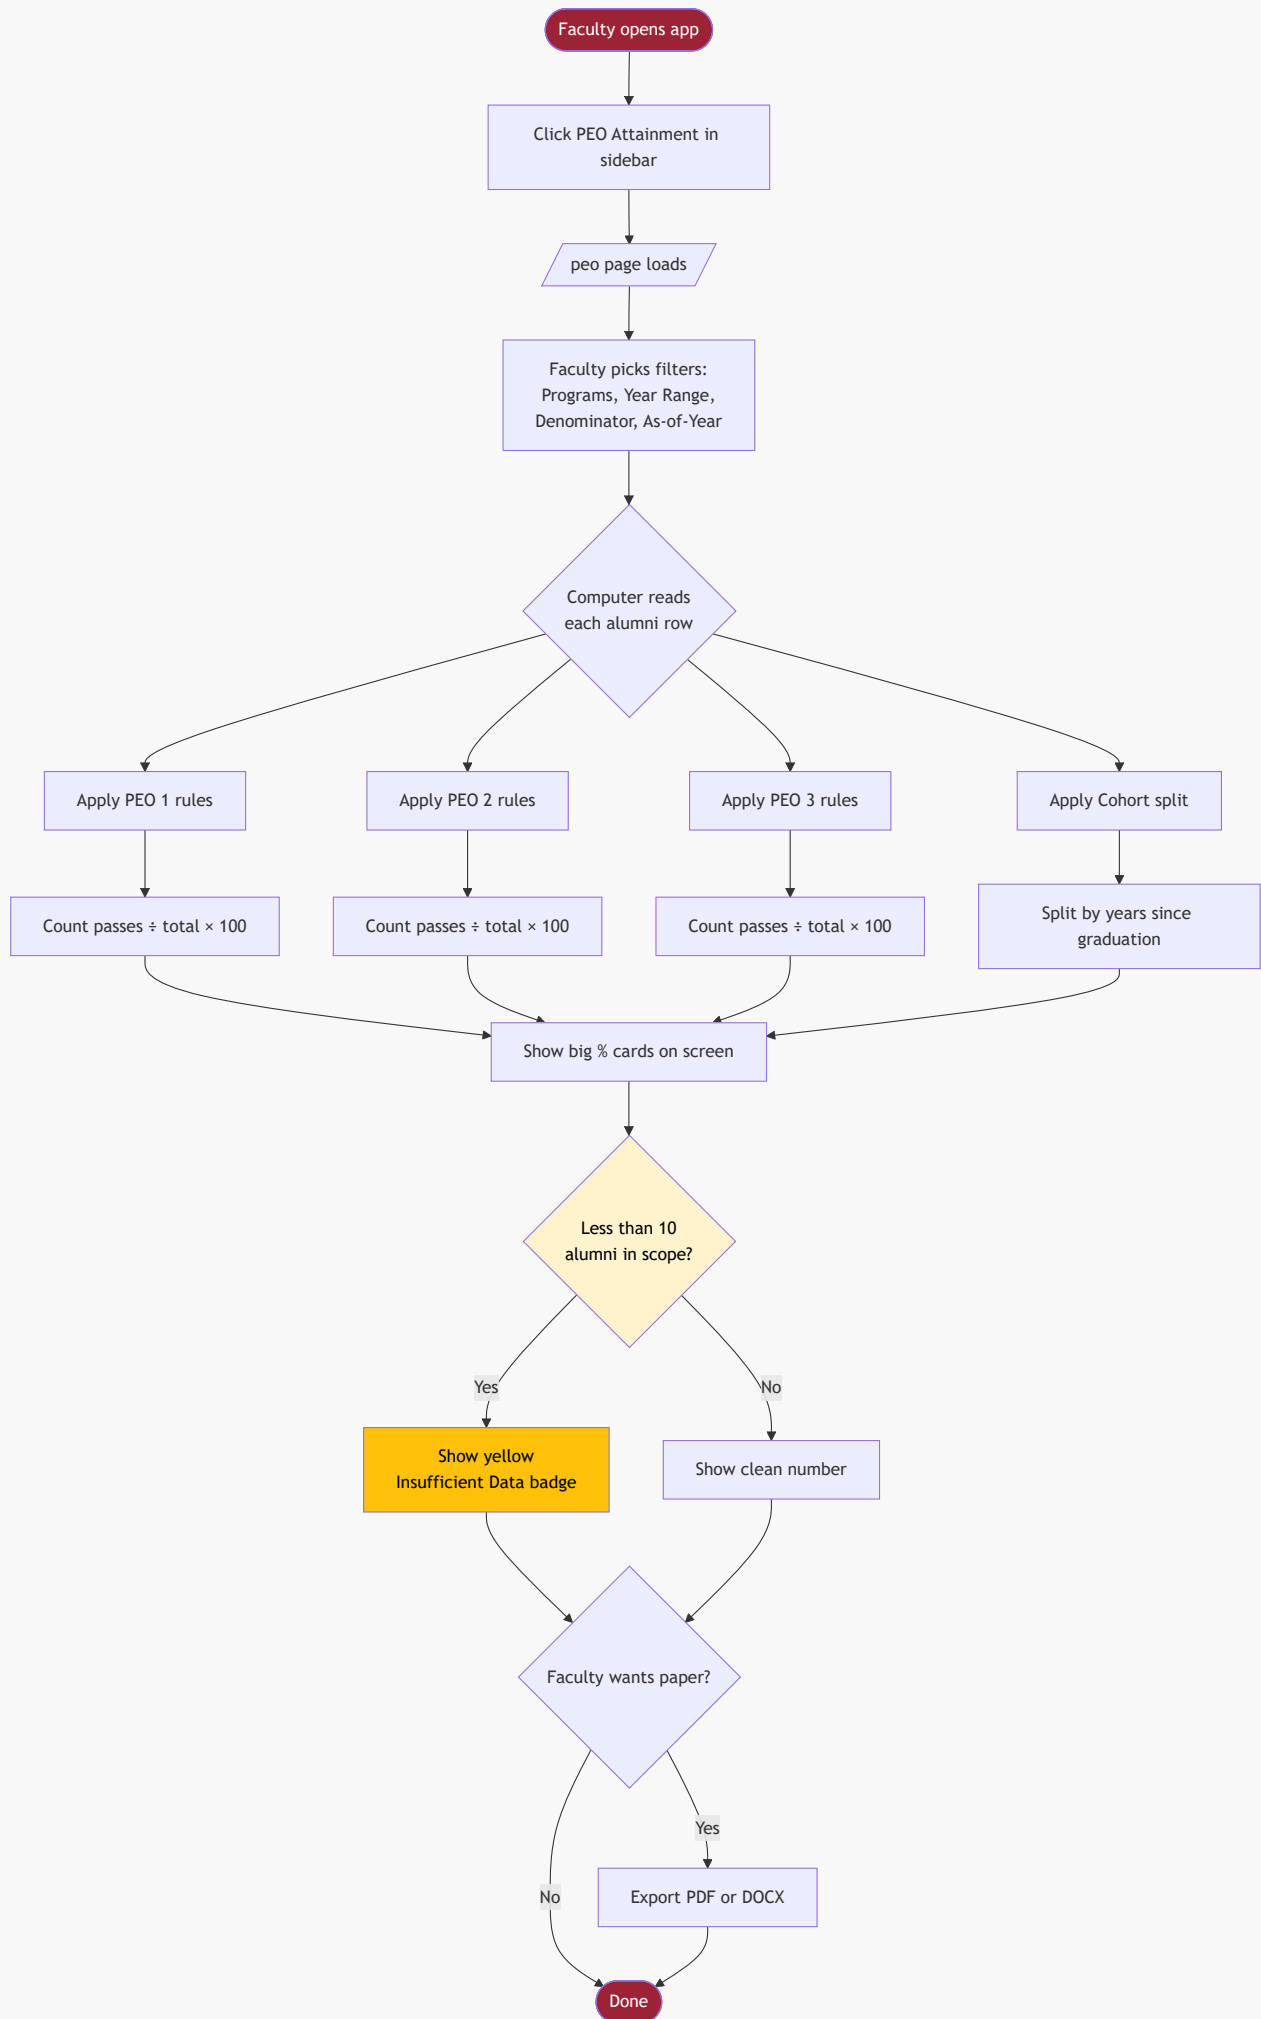

School make 3 promises about graduate. Now we count: **how many alumni really became this?** Big number on screen = proof for accreditation people.

The Three Promises

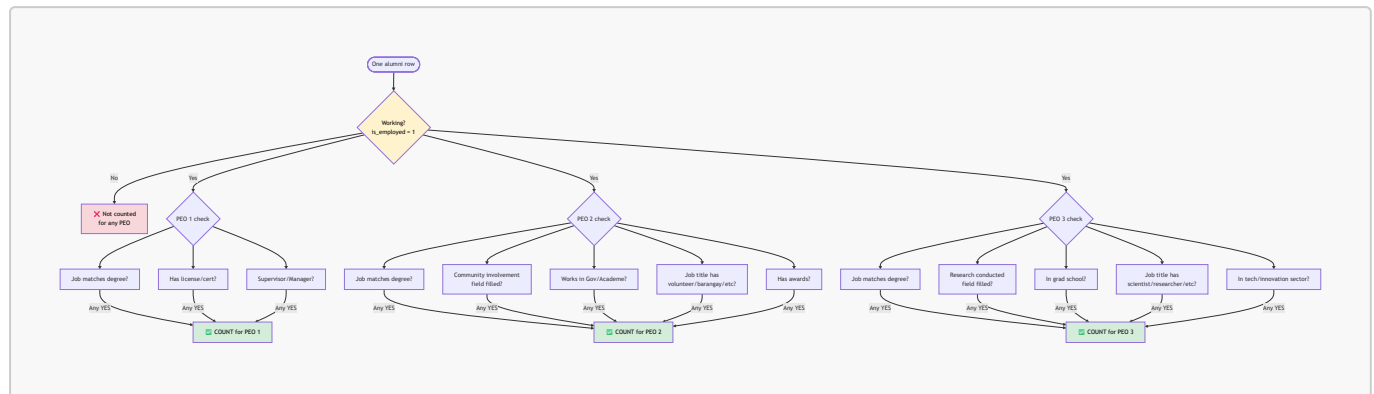

PEO	Short Name	The Promise
 PEO 1	Professional Competence	Graduate good at job — skilled, licensed, climbing ladder
 PEO 2	Ethics & Social Responsibility	Graduate good person — helps community, ethical, recognized
 PEO 3	Innovation & Sustainability	Graduate makes new things — research, tech, sustainability

How It Works — Big Picture Flowchart

How Each PEO Gets Counted (Decision Logic)

Caveman rule: Working = MUST. Then any ONE box ticked under that PEO = COUNT.

Step-by-Step Walkthrough

Step 1 — Faculty Open App

Faculty click sidebar → **"PEO Attainment"** 🏆

Page open. Show 4 tabs at top:

[PEO 1] [PEO 2] [PEO 3] [Outcome Rates]

Step 2 — Faculty Pick Filters

Top of page got buttons:

- **Programs** → pick CE, CpE, EE, or all
- **Year range** → pick 2018 to 2025 (or whatever)
- **Denominator** → "all alumni" or "only employed"
- **As-of-Year** → default = today's year (2026)

🔒 Dean see all programs. CE Chair only see CE — robot enforce this automatically.

Step 3 — Computer Goes to Database

For **each alumni row**, computer ask 4 questions per PEO. See decision flowchart above [↑](#)

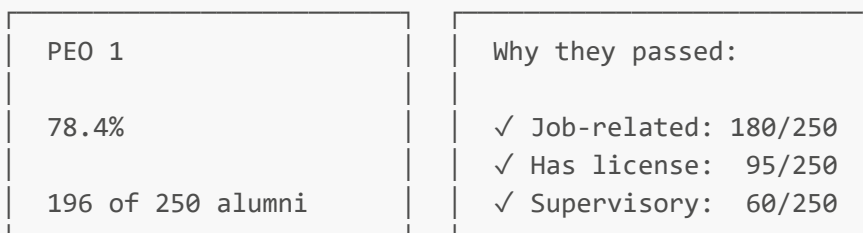

Step 4 — Computer Does Math

PEO 1 % = (alumni who passed PEO 1) ÷ (total alumni) × 100
PEO 2 % = (alumni who passed PEO 2) ÷ (total alumni) × 100
PEO 3 % = (alumni who passed PEO 3) ÷ (total alumni) × 100

Example: 250 alumni total. 196 passed PEO 1. → **PEO 1 = 78.4%** ✓

Step 5 — Show Big Number on Screen

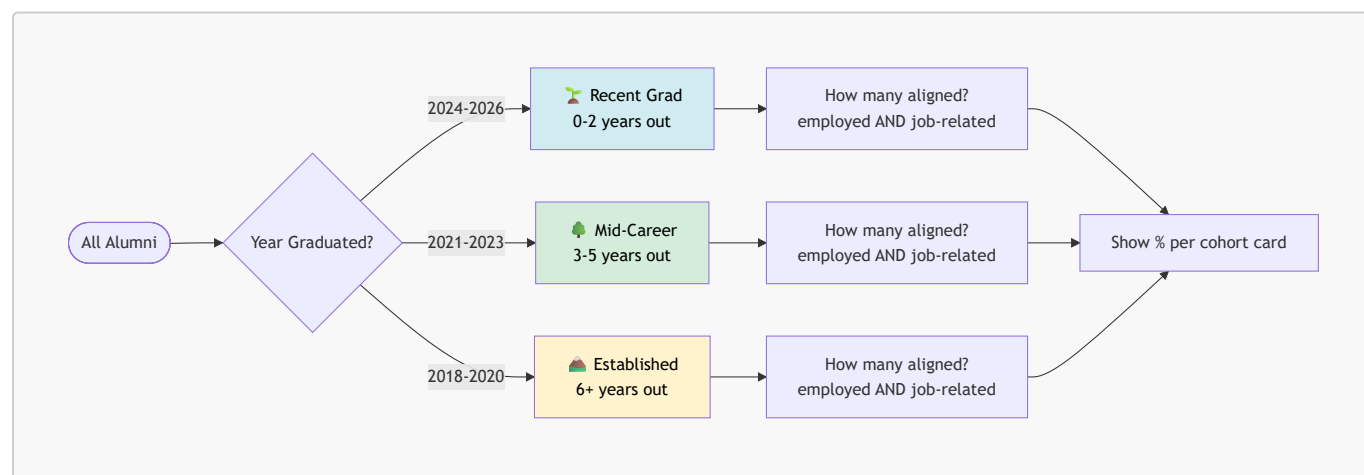

Faculty see:

Left card = the big % number. Right card = **show the work**, like math homework. Accreditor can see exactly which boxes ticked.

Step 6 — Outcome Rates Tab (Cohort Split)

Splits alumni by **how long since graduation**:

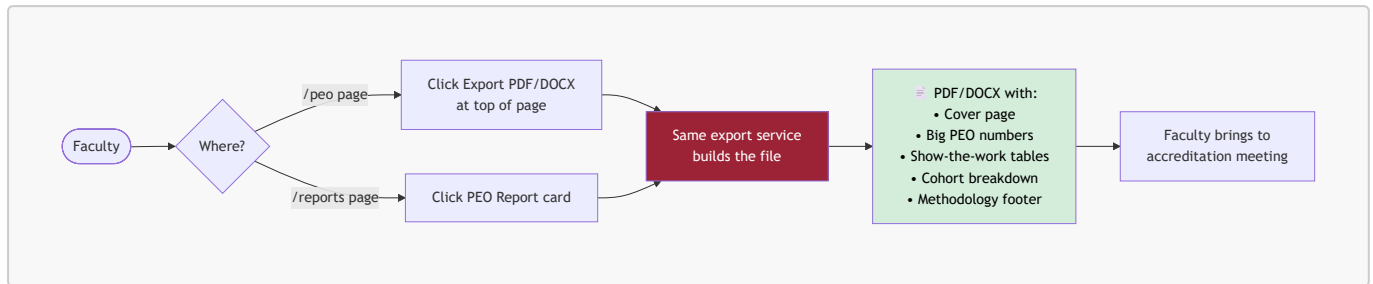

Cohort	Graduated	Why care
 Recent (0–2 yrs)	2024–2026	Fresh grads — still finding feet
 Mid-Career (3–5 yrs)	2021–2023	Sweet spot for accreditation
 Established (6+ yrs)	2018–2020	Old grads — should score highest

If old grads score LOW → red flag for school. School not preparing them well.

Step 7 — Faculty Want Paper Report

Faculty click "**Export PDF**" or go to **Reports page** → "PEO Attainment Report" card.

Safety Nets

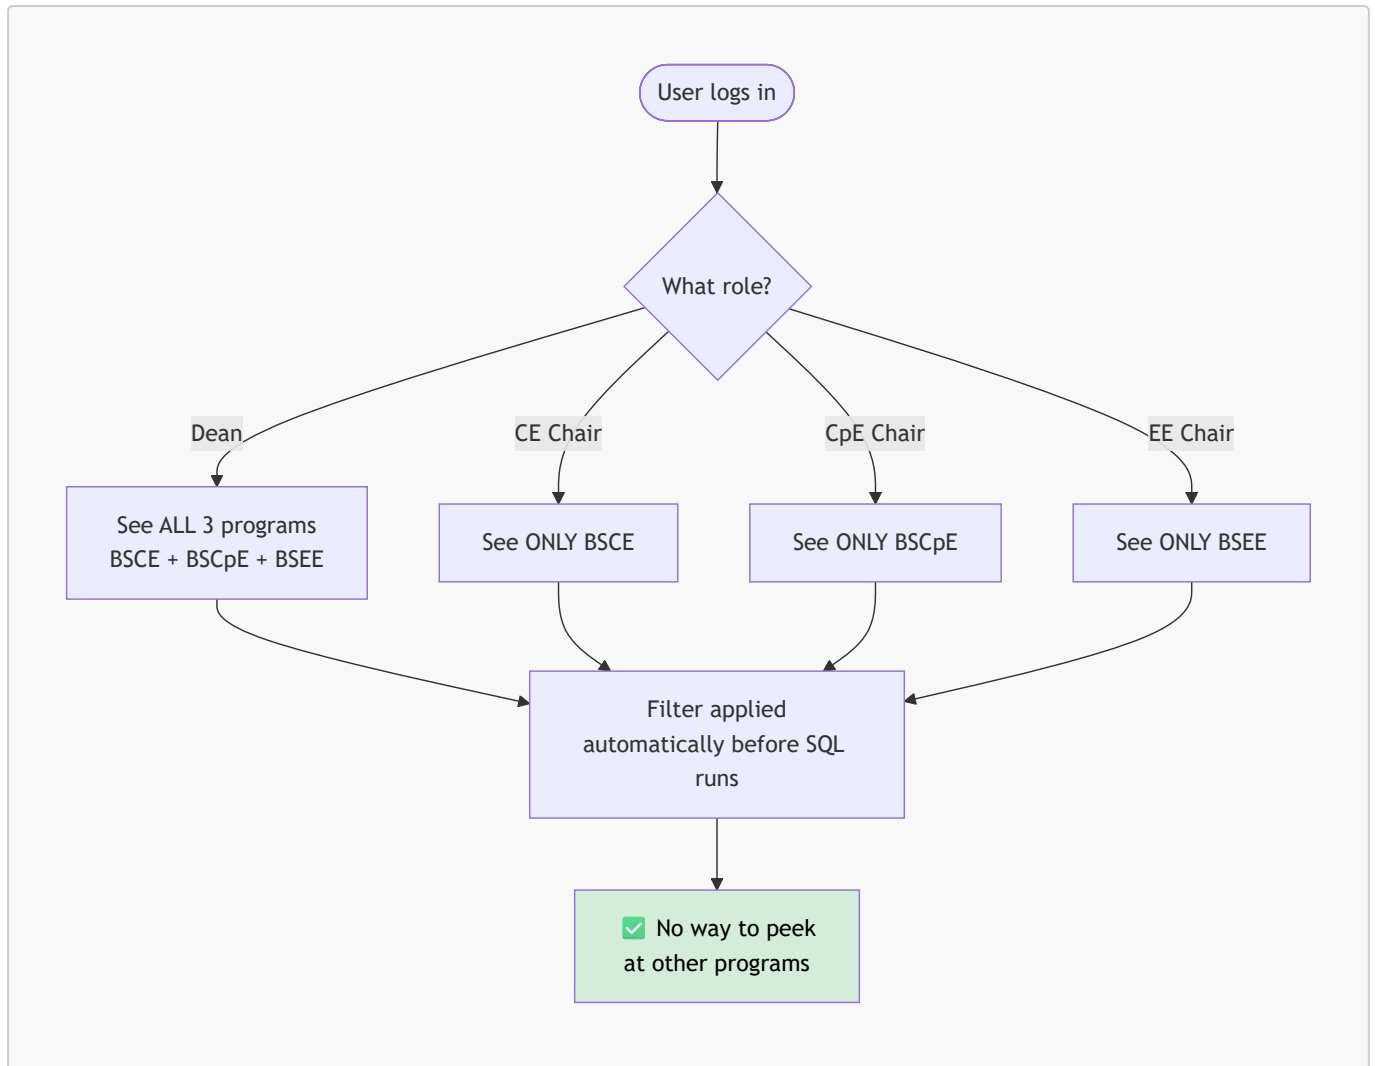

● "Tiny Number" Warning

If only **8 alumni** match the filter, computer NOT just say "100%!" Computer add **yellow badge**:

⚠ Insufficient data (n=8)

Why? Because "100% from 2 alumni" embarrass school. Honesty better.

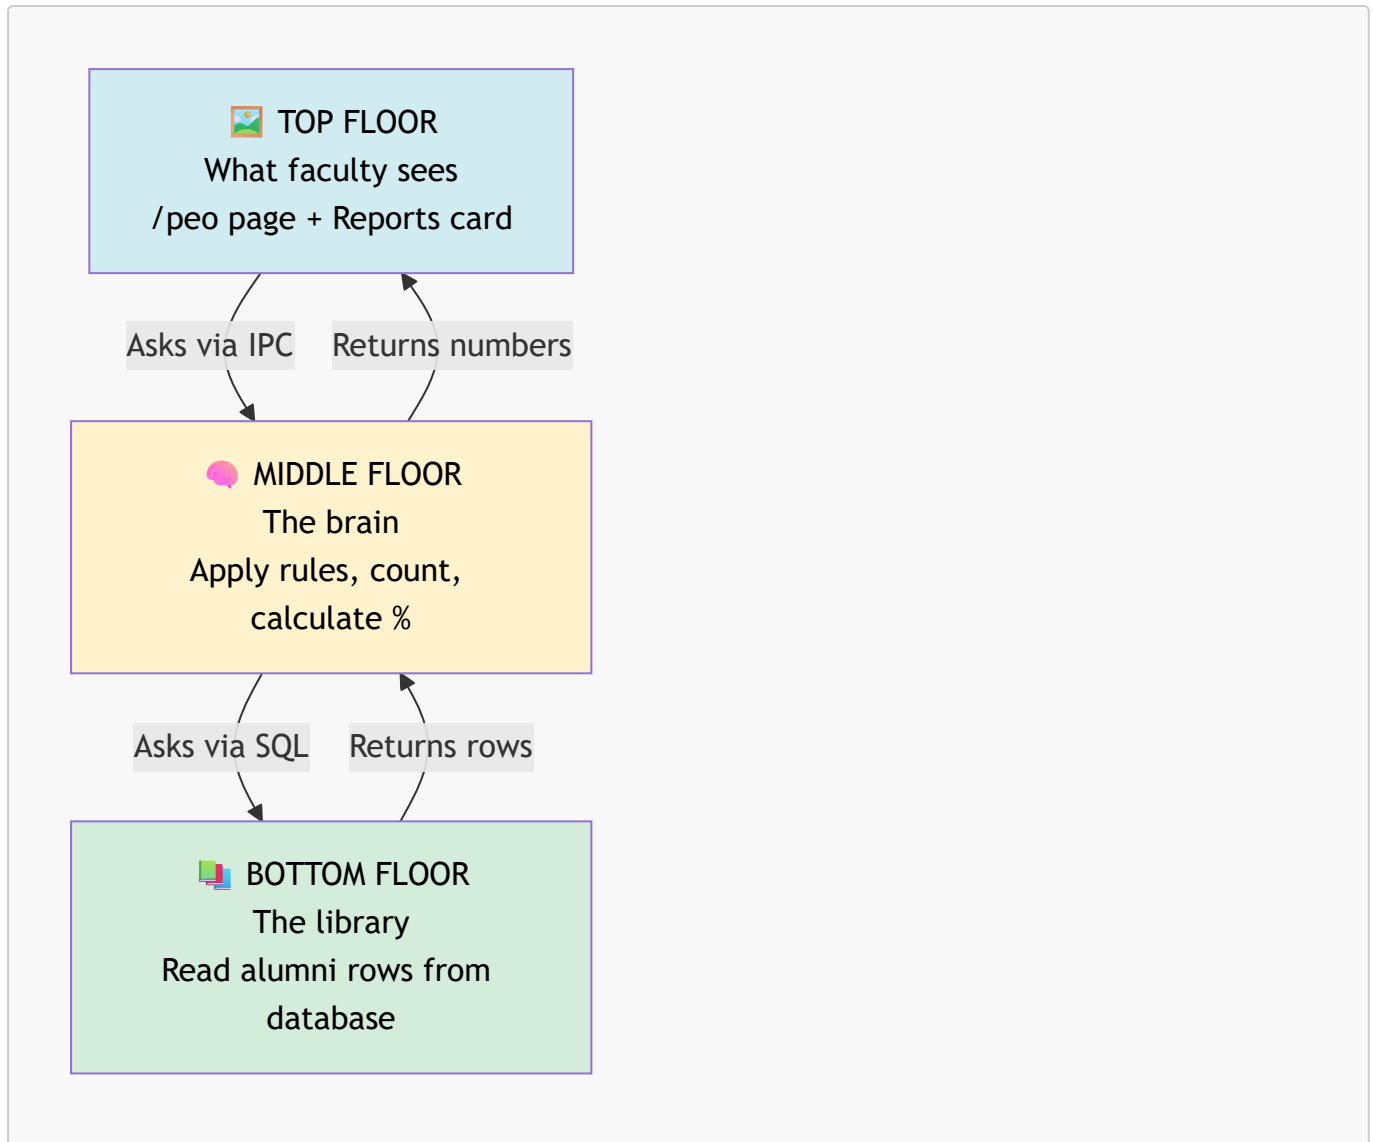

🔒 Permission Locks

Date Auto-Updates

Cohort math uses today's year automatically. Next year, "Recent Grad" shifts from 2024-2026 → 2025-2027 by itself. No manual edit needed.

How Computer Builds This (3-Floor Architecture)

Each floor talks ONLY to floor below. Clean. Safe. Easy to fix later.

Where Data Comes From (Already in Database!)

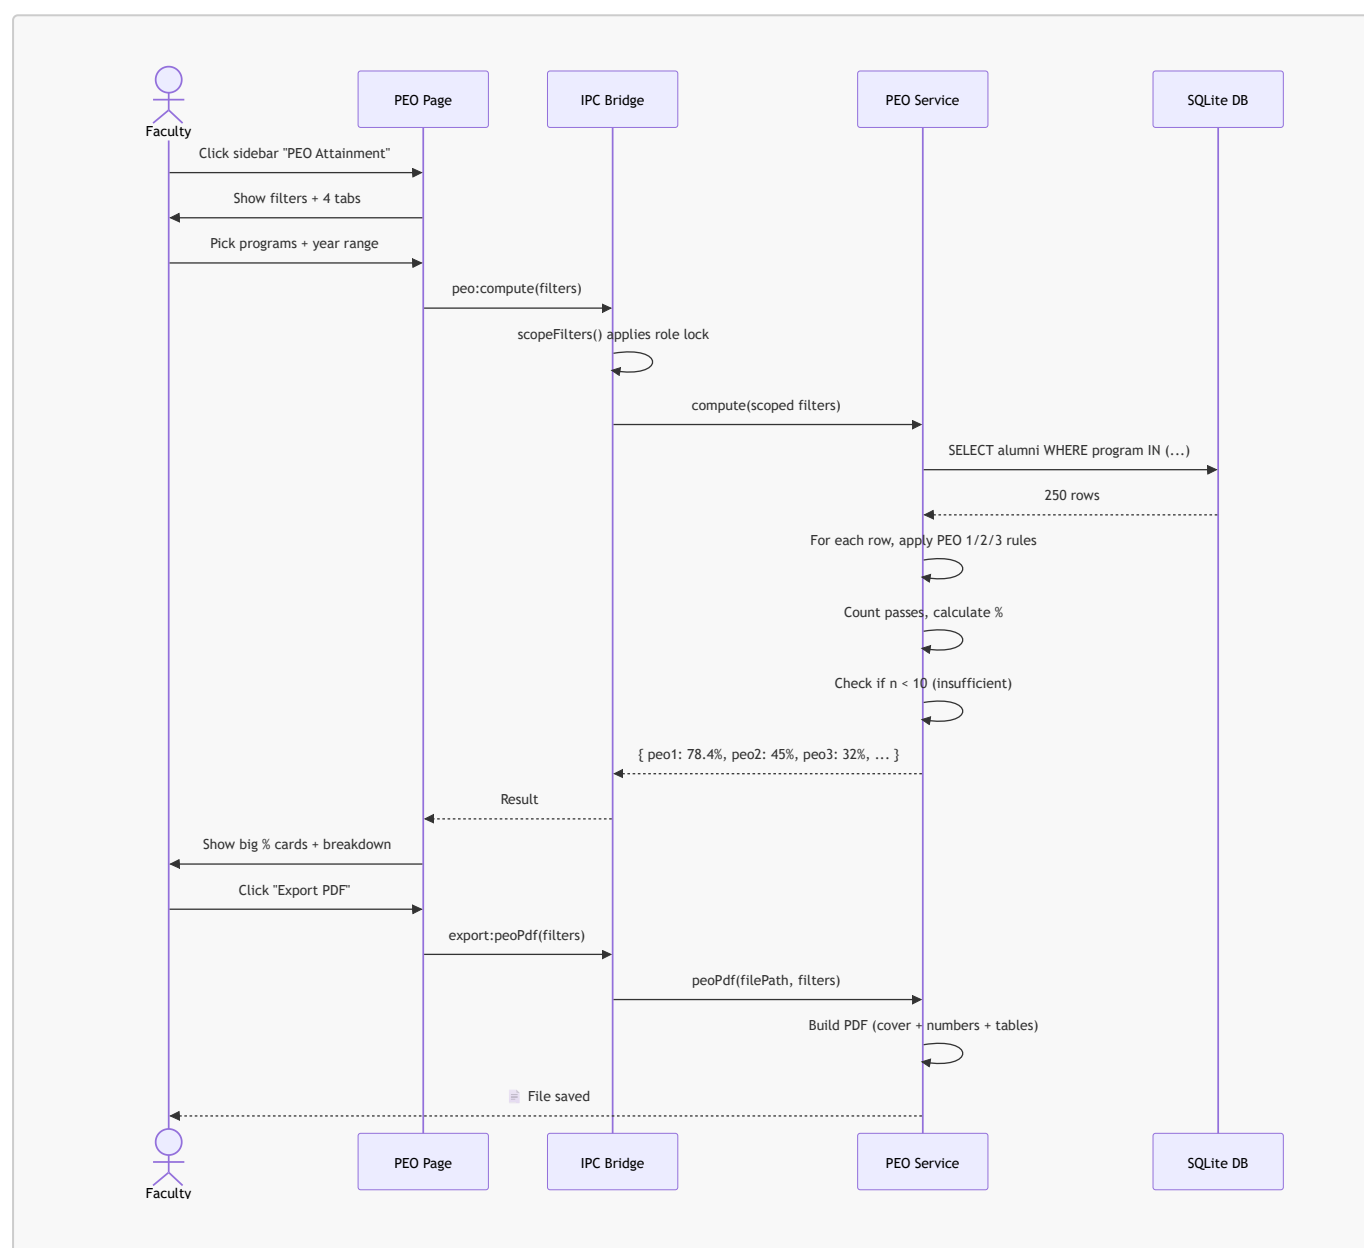

What we check	Database column
Working?	<code>is_employed</code>
Job match?	<code>job_relevance</code>
License?	<code>has_license</code> + <code>other_certifications</code>
Boss role?	<code>job_level</code>
Community work?	<code>community_involvement</code> ★ <i>(direct field exists!)</i>
Research?	<code>research_conducted</code> ★ <i>(direct field exists!)</i>
Awards?	<code>has_awards</code>
Industry?	<code>industry_sector</code>
When grad?	<code>year_graduated</code>

Big win: Database ALREADY has community + research fields. Don't need to ask alumni again. Just use what we got.

What Computer DOES NOT Do

- ❌ Not change any existing data
- ❌ Not break dashboard or other pages
- ❌ Not need internet (works offline)
- ❌ Not show wrong numbers — has tiny-data warning
- ❌ Not let CE Chair peek at EE numbers — locked by role

End-to-End Journey (One Picture)

TL;DR for Non-IT Faculty

PEO module = scoreboard. Plug in filters → see big % number → see why → print it for accreditation.
Safe, locked by role, honest about small samples, auto-updates each year.

Quick Reference Card (Print This!)

Question	Answer
Where do I find it?	Sidebar → TOOLS → "PEO Attainment"
What can I filter by?	Programs, year range, denominator (all/employed), as-of-year
Why does it say "Insufficient data"?	Less than 10 alumni in your filter — too few to trust the %
Why can't I see other programs?	Your role only allows your program (CE/CpE/EE Chair)
How do I export for accreditation?	Click "Export PDF/DOCX" on /peo page OR go to Reports → "PEO Attainment Report" card
Does it update automatically each year?	Yes — cohort years roll forward each January
What if alumni didn't fill the community/research field?	Computer falls back to checking job sector + job title keywords
Will it slow down the app?	No — same speed as the dashboard

End of explainer. For technical details see [PEO-IMPLEMENTATION-PLAN.md](#).
